Reading, Evaluating and Citing Information

**Discussion:** Use the *Scientific Information Tutorial* “Reading, Evaluating and Citing Information” for a discussion on information bias and the importance of evaluating and citing information.

**Activity:** Examine a website given to you by your instructor. Locate another website on the same topic and compare it with the instructor-assigned website. Write a one-page review stating why the website you located is a better choice for academic research.

Use the Science Information Tutorial “Reading, Evaluating and Citing Information” to guide your analysis and discussion.

Consider the following:

- Bias/objectivity
- Evaluation criteria
- Alternative information sources
