Creating, Sharing and Finding Scientific Information

Discussion: Use the Scientific Information Tutorial “Creating, Sharing and Finding Scientific Information” for a discussion on the scientific method, scholarly communication and the peer review process.

Activity:

Find and examine a peer review journal article using the library database ScienceDirect. You may ask a librarian to help you. Write a one page analysis of how the article you have located is a reflection of the scientific method.

Use the Science Information Tutorial “Creating, Sharing and Finding Scientific Information” to guide you in your analysis and discussion.

Consider the following:

- Scientific method
- Scholarly communication
- Peer review
